

Clallam Transit and MOA Base

Port Angeles, Washington

Clallam Transit's new maintenance, operations, and administrative facility was placed on a centrally located site with approximately 20% identified as wetlands. The city streets/arterials on the other two sides provided the necessary access flexibility. Great care was exercised to analyze the appropriate solution for this project from programming and design relationship to material selection.

Project Data
Date of Occupancy: 1995
Cost: \$7 million
Size of Project: 25,000 square feet
