

# Jason Lee Middle School

Tacoma, Washington

...brought back to its original grandeur...

This project for the Tacoma School District began approximately 10 years ago with the assessment and implementation of masonry wall ties and roof parapet stabilization. With the passage of the bond issue, Merritt was selected to complete the renovation of the entire school. This work consisted of renovation/modernization of the main classroom building improvements, a new skin to the gymnasium, and an addition of a student commons and library with related space. The auditorium is a special space which was brought back to its original grandeur, based on the same design issues that presented themselves at the Rialto Theatre.
