

Thea Foss Waterway Planning

Tacoma, Washington

Merritt led the overall master planning and programmatic E.I.S. for uplands redevelopment, and later facilitating “in-water” planning workshops with the stakeholders to assist in moving redevelopment permitting forward for docks/floats and in-water uses. The planning process and facilitation approach was a success for both projects. Since the Thea Foss Waterway Planning, the City of Tacoma, Metropolitan Parks District of Tacoma, City of Lakewood and Pierce County Parks have used Merritt for several other master planning and publicly held workshops projects to accomplish non-bias direction, approach and stakeholder buy-in.
