

Fircrest Town Hall

Fircrest, Washington

Merritt worked with the Town of Fircrest over a number of years to identify program needs, explore alternate solutions, and ultimately design and construct a new 6,000 sq. ft. Town Hall on the existing Town Hall site. The completed project responded to the expanded needs of the town, while reflecting the appropriate design qualities that tied the solution to the historic Town Hall. The new Town Hall was successfully designed to ensure that it would blend seamlessly with the City's established style.

... reflecting the appropriate design qualities that tied the solution to the historic Town Hall.
