

Cliff Street Lofts

Tacoma, Washington

Adaptive re-use of this historic commercial/warehouse building provided 46 loft apartments....

This was the second loft housing project in downtown Tacoma. The adaptive re-use of this historic commercial/warehouse building provided 46 loft apartments suited to performing and graphic artists. The first floor of the renovated building featured retail shops and offices. The 60,000 square foot building was first constructed in 1907, and expanded in 1921, doubling in size.
